

Gene Therapy

Control the tumor cell around coagulum
kill the tumor cells around coagulum

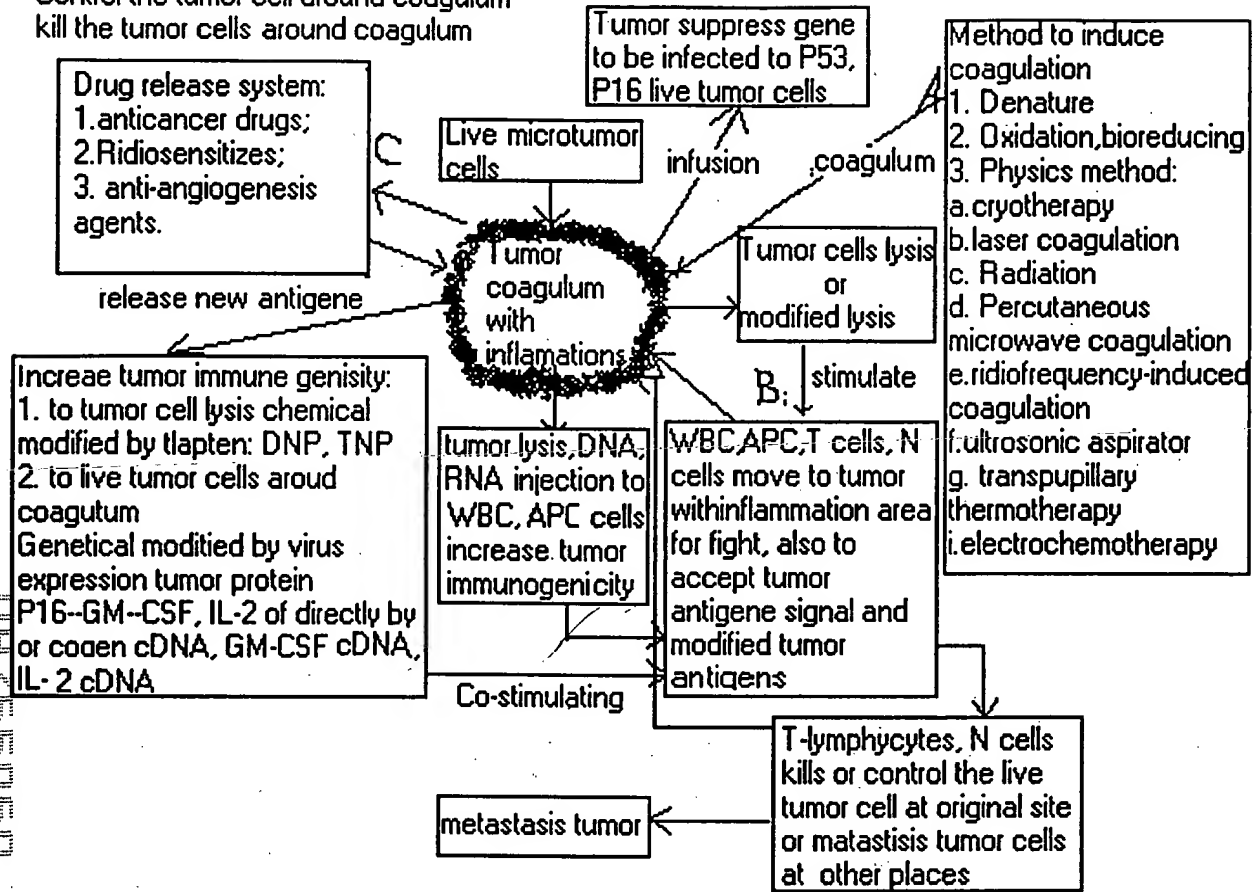

Figure 1 of 4

① spinal needle slowly injection

② turning the tip of needle around in tumor

③ preparation of injection channels in tumor by the probe of injector

④ multiple injection at one time period injection at different time

⑤ High pressure injection by dilation injector. 大氣壓 0-6. Amp at one time. High pressure Solution can penetrate into cell extracellular matrix between tumor cells.
